

Union County Clerk of Court request for Union County- The Clerks Office has many, very large (Approx 30 inches x 30 inches that hold paper records of Plots of property, from the late 1800's and up. The Clerk has started getting a book at a time at the end of the year and has any money left in her small budget, she will send one to get it digitized and the plats of property that have been torn, etc. They have many large books left. She had asked me to ask the state if it would be possible to provide \$20,000.00 so they could get two more sent for upgrading so the public will have easier and better access to the information that can be read. Each upgrade for one book is \$10,000.00. This will give them 2 more. But at the rate now, it will take decades to get them all converted, but this will help tremendously. Converting these books also gives them much more room in their office.
